

# PowerWave

The PowerWave 201 two-person spa was designed for those with space and electrical limitations. The white acrylic shell is formed into a space-saving triangle design, allowing you to put it practically anywhere. Its 7 jets are powered by a 1.5 HP pump that can either plug right into the wall or be converted to a 220V connection. At just 29" high, it is also easy to enter and exit the tub.
